

Why buy bottled water?

Do you realise how much money you are spending on buying bottled water, stored in plastic bottles?

Many families spend \$10-\$15 per week, which is \$500.00 -\$700.00 per year, but over 5 years is an average \$3,000.00.

By getting your own water filtering system, you can have as much fresh running water as you like at a fraction of the cost and enjoy the ongoing savings benefits year after year.

Contact Kevin Campbell of Sparkling Water Systems on (07) 571 3005 for more information or visit www.waterfilterstauranga.co.nz.
